**Research Interests**

I study various topics pertaining to human resource management, organizational behavior, and organizational research methods. I am currently working on projects related to staffing organizations (e.g., employee performance; employee selection; cognitive ability testing) and organizational research methods (e.g., big data; meta-analysis; content analysis; philosophy of science). Much of my research time is devoted to serving as Director of the metaBUS project (metaBUS.org), which maintains the largest database of hand-curated, published research findings in the social sciences.
